Average power dissipation = 80 mW

Operating temperature = -65°C to 85°C

[✓] Mil-Approved Devices, See Page 5 for Level of Qual

The germanium diodes listed here are BKC's most popular parts. However, we have the capability to make many other germanium diodes with minimum orders. If you are interested in a part not listed here, please consult the factory for availability.

^{*} For matched pairs, use a 2- prefix. Pairs are grouped in 10 millivolt V_F cells, measured at 1 mA I_F
